Dromaius novaehollandiae Faecal Scoring System

Type 1

Type 2

Type 3

Type 4

Type 5

Type 6

Type 1: Stools with defined shape, and a little dry. Fibrous structures may be found.

Type 2: Feces maintain defined shape, are compact and have less humidity than type 3.

Type 3: Stools have a defined structure with cohesion and soft texture.

Type 4: Wet appearance with grainy but undefined texture and little cohesion. Some portions may be formed but inconsistent.

Type 5: Thick-liquid consistency. Some splattering may occur.

Type 6: Watery consistency. Feces can be found scattered and are difficult to recognize as manure.
