Addax nasomaculatus

| BCS | Pelvis (hook, pin) | Tail Head | Ribs | Back | Neck/ Shoulder | Notes |
|---|---|-------------------------|-----------------------|---|---|---|
|  <p>1. Emaciated</p> | Bones sharply visible | Deep sunken depressions | Extremely prominent | Vertebrae clearly visible | Scapula clearly visible, neck ropey | No fat, little muscle.; boney structures all visible |
|  <p>2. Very Thin</p> | Very little fill over bone | Sunken depressions | Very prominent | Vertebrae visible | Scapula visible, neck/shoulder sharp junction | Very thin, small amount of muscle, boney structures visible; hooks & pins prominent, ribs obvious. |
|  <p>3. Thin</p> | Hook, pin easily visible | Depressions visible | Easily visible | Lateral processes visible | Scapular spine visible | Some individual spinous processes are discernable; hook and pin bones visible with fill in between. |
|  <p>4. Slightly Thin</p> | Flat from top of pelvis to tail head | Slight depressions | Outline visible | Lateral processes still visible, but spine smooth | Slight scapular spine visible | Spine smooth (spinous processes not visible), ribs can be seen. |
|  <p>5. Moderate</p> | Slight rounding to tail head; h/p covered | No depressions | Faintly seen caudally | Flesh obscures vertebrae | Shoulder smooth | Faint ribs can be seen, especially caudally; rounded rump, still see hook and pin, but with some cover. |

| | BCS | Pelvis (hook, pin) | Tail Head | Ribs | Back | Neck/ Shoulder | Notes |
|--|--------------------------|--|---|-------------|-------------------------------------|--|--|
|  | 6. Slightly Fat | Round from top of pelvis to tail head | Small fat deposits, slight crease may be seen | Not visible | Back flat, withers slightly rounded | Smooth neck/shoulder junction; neck/shoulder rounded | Rounded over pins, hooks, shoulder, spine with flat back. Small fat deposit lateral abdomen in front of stifle. |
|  | 7. Moderately Fat | Hook, pins covered, rounded to tail head | Moderate deposits, slight crease | Not visible | Back flat and wide, rounded withers | Scapula well covered | Fat pockets in front of stifle, behind elbow, and at tail head. |
|  | 8. Fat | Very rounded | Bulging fat deposits, crease | Not visible | Slight crease, wide withers | Bulging at neck/shoulder junction | Fat behind shoulder, over ribs; back is wide and flat with a slight crease. Fat may be visible on ventral midline. |
|  | 9. Extremely Fat | Fat pockets over rounded rump | Deep crease on rump, bulging fat | Not visible | Positive crease along back | Bulging fat | Fat covers most of muscle, and bony structures are not visible; body is very rounded, and may appear lumpy with fat. |
